NovaTech Solutions — Refund and Cancellation Policy

Fictional policy document for policy-retrieval tests

Purpose: This fictional document is designed for experimenting with document loading, text chunking, embeddings, metadata, and semantic search.

1. Subscription Cancellation

Customers can turn off renewal from the billing dashboard. Cancellation stops the next renewal; it does not automatically refund the current billing period. Access generally remains available until the end of the already-paid period, unless the account is suspended for another reason.

2. Refund Eligibility

A customer may request a refund for a duplicate subscription charge or an incorrect charge reported within 14 calendar days of the transaction. Requests are reviewed by the Billing team. A request does not guarantee approval, and the customer may be asked to provide the invoice number and payment reference.

3. Refund Processing Time

After a refund is approved, NovaTech initiates the refund within 5 business days. The time for the money to appear in the customer's account depends on the payment provider and bank. Support cannot promise an exact posting date.

4. Non-Refundable Situations

Unused time in a current subscription period is generally not refundable solely because a customer chose to stop using the service. Custom implementation work that has already been completed is not covered by the standard subscription refund process. Any exception must be approved in writing by the Billing lead.

5. How to Submit a Request

Email billing@novatech.example with the workspace name, invoice number, transaction date, and a short explanation. Do not send passwords, full card numbers, or one-time authentication codes. The Billing team aims to provide an initial response within two business days.

6. Conflicting or Missing Information

This sample policy does not define a refund rule for every possible case. If a question is not answered here, the correct response is that the document does not specify the rule and the customer should contact Billing. Do not infer approval from the fact that a request was submitted.

Training sample only. NovaTech Solutions and the example policies, products, prices, and API are fictional.
